## CAST METALS FEDERATION

Welcome to the Cast Metals Federation -  
Home of the Best of British Casting!

The CMF provides an impartial, free link to all the best in cast metals production. With 200 members producing in total over £1.8bn of castings in any size, any shape, any metal, any weight and any process, the CMF brings you directly into contact with foundries and foundry supply companies for every application.

The CMF also sets out to inform and advise castings buyers and component designers, providing a single source of information on the 'fundamentals' of the various casting processes, and guiding them to better castings from better suppliers.
